This is a Markdown document

You can now write your web page in Markdown.

You opened a `textarea` tag, but a `xmp` tag works as well.

And, yes, it is **as simple** as **one** HTML line at the beginning and **one** HTML line at the end of this document.

This second example supports UTF-8 input

Yes, that's cool. Did you know that Næreen is originally an Iranian name ?

(Compiled to **PDF** from a `HTML/Markdown` file (powered by `StrapDown.js`) with **strapdown2pdf**, `v0.9`.)
